In the box

The box contains the Solaris X2 speaker, a USB-C charging cable, a carrying strap and this manual. A wall charger is not included; any USB-C charger of at least 10 watts can be used.

Before first use

Charge the speaker fully before using it for the first time. A full charge takes about 3 hours. While charging, the LED ring glows orange; it turns solid blue when the battery is full.

Pairing with Bluetooth

Hold the power button for 3 seconds to switch the speaker on. Press the Bluetooth button once; the LED ring flashes blue. Select Solaris X2 in the Bluetooth settings of your phone. The speaker remembers up to 8 devices.

Battery and water resistance

A full battery plays music for up to 8 hours at medium volume. The speaker is rated IPX5, which means it is protected against splashing water, but it must not be put under water.

Troubleshooting

If the speaker stops responding, hold the power button for 10 seconds to restart it. To restore factory settings, hold the power and volume-down buttons together for 5 seconds; this also removes all paired devices.

Warranty

Solaris X2 comes with a 2-year limited warranty from the date of purchase. The warranty does not cover damage caused by submerging the speaker in water, drops, or opening the case. Keep your receipt as proof of purchase.
